

INTERVALVE® POONAWALLA LTD.

The name says it all

EL-O-MATIC (INDIA) PVT. LTD.

ACTUATOR, VALVE AUTOMATION & ACCESSORIES

<p>PNEUMATIC ACTUATOR</p>	<p>Compact design, Rack & Pinion rotary quarter turn pneumatic actuator available in Double Acting & Spring Return type, in both "P" & "E" Series.</p> <p>Torque range : 12Nm to 5000Nm. MOC : Die Cast Aluminium , Carbon Steel, Stainless Steel</p> <p>Actuators with End Stroke Adjustment available 180 deg rotation Actuator in "P" series design are also available.</p>	
<p>ELECTRICAL ACTUATOR</p>	<p>Electrical rotary actuators, in Series ELS / EL / ELQ Models for on/off application and modulating applications.</p> <p>Torque Range : 18Nm to 2500 Nm Protection Class : Weather proof / Ex- proof Manual Override facility available as an option</p>	
<p>REMOTE OPERATED BUTTERFLY VALVES (ON- OFF / CONTROL)</p>	<p>Butterfly valves of Resilient Seat type, double offset, triple offset design coupled with Elomatic actuator along with control accessories, covering solenoid valves / positioner / Limit switch modules / position transmitter along with Air filter regulator for wide industrial applications. Systems are offered tailor made to suit customer specifications and requirements.</p> <p>Special : Block and Bleed systems Applications : Valves with Extended stem for underground Installation.</p>	
<p>ON/OFF FLOATING BALL VALVE SYSTEM</p>	<p>Remote operated Ball valves of floating design in full bore and reduced bore type with Elomatic actuator and pneumatic accessories along with limit switch modules for on- off applications in various industries like Oil & Gas, Steel , Process, Petrochemical and paint industries.</p> <p>Special : Two Stage valves for batching application Applications : Block & Bleed systems for burner application : Fire Proof Enclosure systems in Oil & Gas Indst. : Multiple valves with Single Actuator : 3 way valves with "L" or "T" port configuration</p>	
<p>ON/OFF TRUNNION MOUNTED BALL VALVE SYSTEM</p>	<p>Trunnion Mounted ball valves used in critical service for various applications are offered with Elomatic actuator for sizes 4" and above along with accessories to meet the customer specific requirements.</p> <p>ESD valves in particular offered with Partial stroking device used predominantly in Oil & Gas industries are assembled and supplied with Elomatic systems.</p>	
<p>ACCESSORIES</p>	<p>Manual Override Limit Switch box with Proximity / Mechanical switches Solenoid Valves Positioner, Position Transmitter Air Filter Regulator Quick Exhaust Valve, Flow Control Valve, Direction Control Valve Air Lock valve, Pressure Booster, Volume Booster Partial Stroke Device Air Tank, Fire Safe Box, Flexible Fire Jacket</p>
